

## Retire revision **1-28-09**

Two of the three retirement files contained an error. The "*Retire Example*" and "*Retire Worksheet*" files have been updated. The changes are typed **in red** on those two files.

What was changed:

In the original version of these two files, the first line in Column 1 was titled "FAC". You were instructed to insert your FAC (from the ORS website). However, your take home pay "*if you continue to work*", should be calculated from your "*total pay*" for next year, not from your FAC. Your "*total pay*" would include your salary (which increases 1% next year) and any extra duty pay.

The updated version of these two files shows the changes **in red**. The date in the lower right corner of the updated files is **1-28-09**.
